## APPENDIX B1

DOCUMENT IDENTIFIER CODES

NUMBER OF CHARACTERS: Three

TYPE OF CODE: Alpha/Numeric

EXPLANATION: **Identifies:**

(1) Actions as forming a part of the inventory accounting system.

(2) The effect that a transaction has upon inventory control records (as well as the type of document).

(3) The specific relation of various inventory transactions to **appropriation fund** and stock fund financial statements.

RECORD POSITIONS: 1-3

a. The **DI** codes provide a means of identifying a given product (e.g., receipt, issue, demand, inventory count, inventory adjustment, etc.) **to the** logistics system and processing operation to **which** it pertains and further identifies such data as **to the intended** purpose, usage, and operation dictated. The **DI** code enables automatic data processing equipment to select the appropriate program(s) and **to** mechanically perform operations dictated by the code, and provides a corresponding function for **manual** processing.

b. The **DI** code is a mandatory entry **on** all documents entering and leaving the supply distribution systems under **MILSTRAP**. Each transaction, therefore, **will** be identified by an appropriate code. The assignment of the first character of the code is a responsibility **of** DoD.

c. The following rationale is applicable to **DI** codes pertaining **to MILSTRAP** distribution system(s):

(1) The first record position will always contain an alphabetic entry.

(a) Alphabetic D will identify transactions relating **to** inventory accounting system(s) irrespective of Service/Agency or systems within a Service/Agency.

(b) Alphabetic E in lieu of D in the first record position identifies **MILSTRAP** simulated mobilization exercise transactions which will not automatically affect materiel asset records or physical movement of materiel. Services/Agencies responsible for initiating exercises must ensure complete coordination with all DoD Components involved. The following series of codes applicable for MI LSTRAP, MI **LSBILLS**, MI **LSTAMP**, and MI **LSTRIP** are, permanently reserved for simulated mobilization exercise purposes only:

1 MI LSTRAP---E Series

2 MI LSBILLS---H Series

3 MI LSTAMP---T Series

4 MI LSTRIP---U Series

(c) Alphabetic B and X are provided to identify transactions relating to inventory control system(s) within Services/Agencies. Each Service/Agency may develop and assign these codes, but they will be confined to **intra-Service/Agency** use only.

(d) Alphabetic C is provided to identify transactions relating to the inventory control system of DLA and will be confined to **intra-DLA** use only.

(e) Alphabetic Y and Z are provided to facilitate Service/Agency assignment of codes that are necessary to internal depot, supply source, or base operations when they cannot be identified directly to the preceding subparagraph (a), (b), (c), or (d), when they are not universal in scope and application. Transactions containing Y and Z in the first record position may never appear on any documents passed beyond the confines of a base, depot, **ICP**, or equivalent.

(2) The second record position may contain either an alphabetic or a numeric entry. A numeric entry denotes a transaction which affects an on hand balance and shows the general nature of the transaction. An even number denotes a receipt or debit; an odd number denotes an issue or credit. An alphabetic entry, excluding **DI** Code DAC, DAD, or DAS, denotes a transaction which does not affect the overall or total on hand balance.

(3) The third record position may contain either an alphabetic or a numeric entry.

d. **DI** codes are listed on the following pages. Unassigned codes in the D\_ series are reserved for future assignment by DoD.

FEDERAL CONDITION CODES

NUMBER OF CHARACTERS: Two

TYPE OF CODE: Alpha/Numeric

EXPLANATION: There are two different and **distinct** condition codes under the definition of Federal Condition Codes:

a. supply condition codes are used **to** classify materiel **in** terms of readiness for issue and use or **to** identify action underway **to** change the status of materiel.

b. Disposal condition codes are assigned **by** the DRMO based on inspection of materiel **at time of receipt**. A combination of the disposal condition codes, which most accurately describe the materiel physical condition, and the supply condition codes will constitute the Federal condition codes for utilization program screening and review purposes.

K	Multi-Field Correction. Used by reporting activities to correct erroneous serial number, NSN, MCN, LCN, or owning activity address (Do <b>DAAC/UIC</b> of activity in possession of the weapon) reported and posted to the Component Registries master file.
L	Inventory Adjustment - Loss. Reports inventory adjustment loss after all investigative requirements, including report of survey, have been initiated.
M	<p>Do DA <b>AC/UIC</b> Mass Change. This transaction will cause <b>all</b> serial numbers to be dropped from an Do <b>DAAC/UIC</b> (record positions 51-56) and to be recorded with another Do DA <b>AC/UIC</b> (record positions 45-50), which normally results from unit redesignation. Only one transaction is required to change the Do DA <b>AC/UIC</b> in all records.</p> <p>Shipment to Other Agencies. Reports shipments to activities outside the control of DoD. APPENDIX B14

SMALL ARMS ERROR TRANSACTION REJECT CODES

NUMBER OF CHARACTERS: Two

TYPE OF CODE: Alpha/Numeric

EXPLANATION: Identifies the type of transaction error. These codes will be used on line or on reject transactions to identify erroneous transactions rejected by the DoD and Component Registries.

RECORD POSITIONS: 23-24

<u>ERROR CODE</u>	<u>ERROR MESSAGE</u>	<u>SOLUTION</u>
05	Identifies an existing small arms record on the Component Registry Master File but reporting activity did not submit E reconciliation record.	Verify active/inactive records. <b>If</b> weapon is on active file, return the error transaction to the Component <b>Registry</b> with the required transaction code in record position 7 to indicate that the Component Registry is correct, thereby removing the reject suspense and precluding followup action.
06	Identifies a duplicate E record submitted for reconciliation by a reporting activity.	No action required. <b>Duplicate</b> records will be rejected to the Component Registry for verification action. Number of duplicates will be identified as summary information to the activity being reconciled.
07	Identifies a reconciliation request submitted to the Component Registry that reflects another reporting activity as the owner. Reject is included in the Small Arms Record Reject Suspense File which must be cleared to complete the reconciliation.	Verify active/inactive records. 1. <b>If</b> a receipt, request shipping activity to submit required shipment transactions and resubmit error transaction with an R in record position 7 and other pertinent data punched as required to post to Master File and remove the reject suspense.

<u>ERROR CODE</u>	<u>ERROR MESSAGE</u>	<u>SOLUTION</u>
		2. <b>If</b> not a receipt of shipment, and weapon is physically on hand as reported, take the necessary' action prescribed for duplicate, serial numbers within the same NSN.
08	Reflects confirmation that the Component Registry had added a serial number as a result of a reconciliation E transaction processed. No prior receipt of a transaction record received by the Component Registry.	No action required. The reconciliation record will be recorded in the next Component Registry Master File update as an initial registration. The number of code 8 records posted to the Component Master File will be identified as summary information to the activity being reconciled.
09	Identifies a <b>reconciliation</b> request submitted to the Component Registry that is not scheduled for reconciliation on date received.	Verify when reconciliation is scheduled. Reject suspense will not be created.
1A	NSN not Equal to Current NSN	DoD Registry and Component Registry use.
1B	Invalid NSN	DoD Registry and Component Registry use.
1C	NSN Table Date Invalid	DoD Registry and Component Registry use.
2A	Document Identifier Code/ Routing Identifier Code Invalid	Notify reporting activity of the error condition so that its files will be corrected. Correct and resubmit transaction.
2B	Serial Number Contains Blanks	Notify reporting activity of the error and request a corrected transaction be submitted.
2C	Invalid Transaction Code	Correct and resubmit <b>transaction</b> .

<u>ERROR CODE</u>	<u>ERROR MESSAGE</u>	<u>SOLUTION</u>
2D	<b>Unmatched</b> Stock Number	<p>1. If the stock number is not reportable under chapter 12, notify the reporting units to discontinue reporting for this stock number.</p> <p>2. <b>If</b> the stock number is in error, notify the reporting activity of the error and request that a corrected transaction be resubmitted.</p> <p>3. <b>If</b> the stock number is valid and pertinent, but does not appear in the stock number file, prepare and submit transaction H to the computer.</p>
2F	Document Number Date in Error	Verify, correct, and resubmit transaction.
2G	Document Number Serial in Error	Verify, correct, and resubmit transaction.
2J	Invalid Do <b>DAAC/UIC</b> from or Do <b>DAAC/UIC</b> to a Mass Change	Assure that Do <b>DAAC/UIC</b> (from-to) are valid and in the file; correct Do <b>DAAC/UIC</b> .
2K	Invalid Do <b>DAAC/UIC</b> in Document Number	Verify, correct, and resubmit transaction.
2L	Invalid Transaction Date	Verify, correct, and resubmit transaction.
2M	Action Date Greater Than Current Date	Verify, correct, and resubmit transaction.
2O	Invalid Do <b>DAAC/UIC</b>	Verify, correct, and resubmit transaction.
3A	Document Number Interrogation <b>Exceeds</b> Limit	Correct and return transaction by next cycle. Notification will be <b>by</b> card/listing. Listings will reflect error code and narrative description.

<u>ERROR CODE</u>	<u>ERROR MESSAGE</u>	<u>SOLUTION</u>
3B	Serial Number Interrogation Exceeds Limit	Same as 3A.
3C	Stock Number Interrogation Exceeds Limit	Same as 3A.
3D	<b>DoDAAC/UIC</b> Number Interrogation Exceeds Limit	Same as 3A.
3F	Transaction Date Prior to Master Date	Verify, correct, and resubmit transaction.
3G	Unmatched Transaction	Missing transaction(s). Verify, correct, and resubmit transaction.
3H	New Serial Number Matches Previously Established Master File	<ol style="list-style-type: none"> <li>1. Error in reported serial number.</li> <li>2. Duplicate serial number exists.</li> <li>3. Reporting activity must be contacted to verify reported serial number if serial number is in error. Correct and resubmit transaction.</li> </ol>
3I	From <b>DoDAAC/UIC</b> in Transaction Does Not Match <b>DoDAAC/UIC</b> in Master File	Verify, correct, and resubmit transaction.
3J	Transaction Matched on Stock Number But Not on Serial Number	<ol style="list-style-type: none"> <li>1. Serial number error exists in transaction.</li> <li>2. There are missing transactions in the computer. Verify, correct, and resubmit transactions.</li> </ol>
3K	Receipt Transaction Received Prior to Shipment Transaction	Post receipt. Reject Transaction to shipping activity--verify serial number shipped--correct if required.

<u>ERROR CODE</u>	<u>ERROR MESSAGE</u>	<u>SOLUTION</u>
3L	<b>Input</b> Transaction is Incompatible <b>to</b> Master File	Compare rejected <b>transaction against master</b> file and take necessary <b>action</b> to make input transaction (record position 7) compatible, e.g., S transaction on the master file will accept R transaction only.
3M	Duplicate on Serial Number, Stock Number, and Transaction Code	Request printout from the computer by stock number and serial number (Transaction Code 3). Examine transaction to determine if transaction is an exact duplicate. If it is not, correct and resubmit transaction.
3U	NSN And Weapon Serial Number Duplicates Another Weapon On Master File	<ol style="list-style-type: none"><li>1. Verify NSN (record <b>positions</b> 8-22) and serial number (record position 67) of weapon. <b>If</b> incorrect, resubmit correct transaction.</li><li>2. <b>If</b> correct and weapon was received from activity shown in master file, submit receipt R transaction to the Component Registry.</li><li>3. <b>If</b> correct, and weapon was not received from activity shown on master <b>file</b>, take the necessary action described for duplicate serial numbers within same NSN.</li></ol>

## APPENDIX B18

ERROR CLASSIFICATION CODES

NUMBER OF CHARACTERS: Three

TYPE OF CODE: Alpha/Numeric

EXPLANATION: Provides processing activities a means of mechanically identifying the causes for errors which resulted in potential/actual inventory adjustments **and the** processing operations in which they occurred.

RECORD POSITIONS: Entered in record positions 73-75 of physical inventory count transactions (DI Code DKA) and record positions 63-65 of inventory adjustment transactions **(DI Codes 08\_/09\_)**.

a. The physical inventory program error classification codes **provide** a standard means for Services/Agencies to classify the causes of actual/potential adjustments for subsequent analysis, evaluation, and corrective action.

b. The error classification code is not a required entry on **MILSTRAP** documentation but is assigned for internal use in preparing reports and for providing evaluation data to higher authority in standard error classification categories.

c. The following rationale applies to the error classification code structure:

(1) First Position. The first character is the operation code which will be numeric or alphabetic and will **identify** the operation during which the error occurred and not the operation in which the error was detected. Code assignment for the first character **is** controlled by DoD and may not be assigned by the Services/Agencies.

(2) Second Position. The second character is the type of error code which will be alphabetic or numeric and will identify the type of error which occurred. Code assignment for the second character **is** controlled by DoD and may not be **assigned** by the Services/Agencies.

(3) Third Position. The third character may **be** assigned **by** each Service/Agency to internally amplify the error classification. Numeric and alphabetic code assignments in this position will be controlled by each individual Service/Agency for their internal use.

d. The following operation codes are assigned as the first character in the error classification code:

<u>CODE</u>	<u>OPERATION</u>	<u>CODE</u>	<u>OPERATION</u>
0	Not assigned; reserved for future assignment by DoD.	6	Warehousing/Rewarehousing.
1	Receiving.	7	Location Survey.
2	Issue.	8	Other.
3	Physical Inventory.	9	Not assigned; reserved for future DoD assignment.
4	Cataloging Changes.		
5	Logistics Reassignments.	A-Z	Not assigned; reserved for future DoD assignment.

e. The following type of error codes are assigned as the second character in the error classification code and will be used only in conjunction with the operation codes designated:
